Citizen's/Client's Charter for Soil and Land Use Survey of India

1) VISION

The Soil and Land Use Survey of India (SLUSI) is mandated to conduct various types of soil survey on different scales in order to provide soil and land use data for developmental programmes encompassing soil and water conservation planning for watershed management, Scientific Land use planning on sustainable basis.

2) MISSION

To study and generate Soil and Land Resources data at different intensities with present land use as well as limitation and potential of soil for sustainable agriculture development and natural resources management.

3) ACTIVITIES

The major activities of the organization are as under.

- Detailed Soil Survey (DSS) using real time remote sensing data to generate detailed scientific database on Soil and Land characteristics for planning and implementation of various programmes on soil and water conservation and soil health management.
- Technical Support Group (TSG) for providing support to National Mission for Sustainable Agriculture (NMSA).
- Monitoring and evaluation of various developmental projects under NMSA and other national programmes (Soil Health Card / PMKSY).
- Development of Management Information System (MIS) for knowledge networking and monitoring.
- Establishment of Nodal Soil laboratory for analysis/quality checking of soil analysis of other soil laboratories.
- Preparation of plate form free State-wise Digital Micro-watershed Atlas at 1:50,000 scale.
- To conduct trainings for capacity building for officers of state government departments.
- Consultancy /collaborative projects with central/state government departments, research institutes, universities for research/other academic activities.
- Development and promotion of space borne remote sensing techniques for application in mapping and monitoring of soils, land use, land degradation and wastelands etc.
