

## सारांश / ABSTRACT

<b>सर्वेक्षित क्षेत्र Survey Area</b>	: "4E4D3a1, b1-3, c1, c5, c6, d1, d2, q1-6, 4E4D4b1, b4, b7, b8, c2, c3, c4,c5, d1, d4, d5 and d6" micro-watersheds of Pochampad Catchment (Jayakwadi, RVP), Tehsils.- Kopargaon, Distt.- Ahmadnagar , Tehsils.- Vaijapur, Distt.- Aurangabad and Tehsils.- Yeola, Distt.- Nasik, Maharashtra state.
<b>२. कुल क्षेत्रफल मैप किए गए Total Area Mapped and Reported</b>	: 30,150 ha
<b>३. आधार नक्शे Base map used</b>	: 1. उत्तर संकल्प उपग्रह छवि (LISS IV)  मापदंड १:१०,०००  High resolution satellite image of LISS IV on 1: 10,000 Scale
<b>४. भौगोलिक स्थिति Geographical Location</b>	: १९° ५५' - २०° ०४' उत्तर अक्षांश N Latitude  ७४° ३०' - ७४° '४० ' पूर्व देशांतर E Longitude
<b>५. सर्वेक्षण का प्रकार Kind of Survey</b>	: विस्तृत मुद्रा सर्वेक्षण  Detailed Soil Survey
<b>६. सर्वेक्षण की अवधि Period of Survey</b>	: दिसम्बर, २०१५ से फरवरी, २०१६  December, 2015 – Feb,2016
<b>७. आद्रता जलवायु क्षेत्र Agro climatic Zone</b>	: पश्चिम पठार एवं पर्वत श्रेणी (ज़ोन-IX)  Western plateau and hill region (IX)

## 8. Micro-watersheds wise distribution of area under different soil series

विभिन्न सूखम-जलग्रहण क्षेत्र एवं मृदा श्रेणी के अंतर्गत क्षेत्रफल:

Series Name	Area	% age	4E4D3a1	4E4D3b1	4E4D3b2	4E4D3b3	4E4D3c1	4E4D3c5	4E4D3c6	4E4D3d1	4E4D3d2	4E4D3q1	4E4D3q2	4E4D3q3	4E4D3q4	4E4D3q5	4E4D3q6	4E4D4b1	4E4D4b4	4E4D4b5	4E4D4b7	4E4D4b8	4E4D4c2	4E4D4c3	4E4D4c4	4E4D4c5	4E4D4d1	4E4D4d4	4E4D4d5	4E4D4d6

## 11. Salient features मुख्य विशेषताएं:

- ❖ कुल सर्वेक्षित क्षेत्र ३०१५० है. का लगभग ९४५७ है। (३१.४ प्रतिशत) क्षेत्र आति गहरी भूमि और २५०९ है। (८.३ प्रतिशत) क्षेत्र गहरी भूमि है। उथले तथा मध्यम गहरी मिट्ठी के अंतर्गत क्रमशः ५२०४ है। (१७.३ प्रतिशत) एवं १५१७ है। (३८.७ प्रतिशत) भूमि हैं।

Out of the total surveyed area of 30,150 ha, about 9457 ha (31.47 %) area is covered under very deep soils followed by shallow to moderately deep soils covers an area 5204 ha (17.3 %) and 11597 ha (38.5 %) respectively. The Deep Soil has coverage of 2509 ha (8.3%) only.

- ❖ कुल सर्वेक्षण में ९२२ हेक्टेयर (१४.३४ %) पहाड़ी क्षेत्र में आता है जिसका ढलान १०-३३ प्रतिशत है। २७८४५ हेक्टेयर (३१.३७ %) बहुत कम ढलान से कम ढलान के अंतर्गत आता है। केवल ७७ हेक्टेयर (०.३) क्षेत्र मध्यम ढलान के अंतर्गत हैं।

About 922 ha (14.34 %) of the total surveyed area occurs on hilly land with slope percentage ranging in between 10 to 33%. The very gently to gently sloping land covers maximum area of 27845 ha (31.37%). Only 77 ha (0.3 %) area has moderately sloping Land.

- ❖ कुल सर्वेक्षित क्षेत्र ३०१५० है. का २६८६८ हेक्टेयर (८९.१%) क्षेत्र मध्यम कटाव से प्रभावित है। ६.३% (१८९९ हेक्टेयर) क्षेत्र गंभीर कटाव से प्रभावित हैं जिसे उचित मिट्ठी संरक्षण संरक्षण के उपायों की जरूरत है।

Out of total surveyed area 26,868 ha (89.1%) area suffers from moderate erosion. 1899 ha (6.3%) area suffers from severe soil erosion hazards, which is to be reclaimed by proper soil conservation measures.

- ❖ कुल सर्वेक्षण में १८२८९ हेक्टेयर (७६%) में सीमांत रूप से अनुकूलता के कारण इसके गंभीर सीमा की खेती के लिए अनुकूल और स्थायी आधार पर ऐग्रि-सिल्वी-पास्टुरल खेती प्रणाली को अपनाने की आवश्यकता है।

About 18289 ha (76.0 %) of total surveyed area is marginally suited for cultivation due to its severe limitation and required adoption of Agri-Silvi-Pastural farming system on sustainable basis.

- ❖ भूमि क्षमता क्लास-VI में लगभग ३०७ हेक्टेयर (1.0%) भूमि, स्थायी भूमि प्रबंधन के लिए वृक्षारोपण चारागाह विकास की अपनाने की आवश्यकता है।

About 307 ha (1.0 %) land categorized under capability class-VI, requires adoption of plantation pasture development for sustainable land management.

## HOW TO USE SOIL SURVEY REPORT

The present report furnishes a detailed account of various characteristics of the surveyed area, like physiography, relief, geology, climate, natural vegetation, land use and soils. Description of the soil series recognized in the area, like detailed information on soil characteristics, classification, potentialities and limitations are given in the report. Interpretations of different soil mapping units for various applied aspects of agricultural development such as land use plans, soil and water management, soil conservation plans, identification of areas for afforestation, engineering applications, and eco-restoration and waste-land management have been given in different chapters. Different problems of the area have also been depicted and their corrective measures are thereby suggested. Soil survey interpretations for land capability class, soil and land irrigability class, hydrological grouping and paddy grouping are described in chapter 8.

In order to use the report, the user will locate the area of his interest on the soil map appended with the report. Permanent features like roads, village sites, streams and ponds etc. would help for location of specific area. On the map each soil unit has been delineated and represented by symbolic expression dealing with all technical description. The abbreviated symbol of mapping unit shows information about the name of soil series, soil depth, soil texture, land slope gradient, erosion condition and land surface features like gravelliness, stoniness or rockiness. It refers to a particular type of soil like an example P2d\_E3SR that represents P - Petamandi series, 2- shallow depth, d- gravelly sandy loam texture of surface, E- Strong slope (10-15%), 3- severe erosion and SR - for slightly stony and slightly rocky land.

The details of the soil mapping unit with description, extent in each sub-watershed and their multipurpose interpretations (like land capability units, soil and land irrigability classes, paddy soil grouping, hydrological grouping etc) have been shown in appendix I (Guide to soil mapping units).

The differentiating morphological characteristics of soil series are furnished in table 7 and the typifying pedon of soil series are described in Appendix II where detailed description of soils and morphological description of representative soil profiles along with their analytical data are given. micro watershed wise mapping units, their area extent, and present land use and management status, physiography, predominant slope, land use and land capability classification etc. are given in Appendix III.
