

Abstract

- 1. Surveyed Area** : 4G1A Subcatchment of Mahanadi Basin, districts Cuttack, Ganjam, Jagatsinghpur, Khorda, Nayagarh and Puri of Odisha State.
- 2. Location** : **84°57' 12" to 86° 47' 09" East Longitude**
19° 26' 15" to 20° 30' 10" North Latitude
- 3. Total Area** : **9,22,102 ha**
- 4. Agroclimatic Region** : VII (Eastern Plateau and hills) as per planning Commission Classification
- 5. Type of Survey** : Rapid Reconnaissance Survey for Prioritization of Microwatersheds.
- 6. Period of Survey** : December, 2008 to June, 2009
- 7. Base Material used** : Survey of India Topographical maps on 1:50,000 scale.
- 8. Hydrological Sub-division** :
a) Region – ‘4’ All Drainage flowing into Bay of Bengal except those 2 & 3
b) Basin - ‘4G’ (Mahanadi Basin)
c) Catchment – ‘4G1’
d) Sub-Catchment – ‘4G1A’
e) Watersheds –‘4G1A1 to A9’
f) Subwatersheds – 4G1A1a, 4G1A1b,..... to
g) Microwatersheds – 4G1A1a1, 4G1A1a2.....

9. Extent of Area (ha) under Different Runoff Potential Mapping Units (RPMU):

Sl.No	RPMU	Runoff Potential Value	Area (ha)	Area %
1	A01	57	15709	1.70
2	A02	56	244662	26.53

11. Districtwise Distribution of Area (ha) under Different Soil Erosion Hazard:

S. No.	Erosion	Cuttack	Ganjam	Jagat singhpur	Khorda	Nayagarh	Puri	Total Area
1	None to slight erosion	63648	18178	147515	114527	15946	231235	591049
2	Slight to Moderate erosion	3347			17093	1422	499	22361
3	Moderate erosion	3987	8320	8946	9517	4176	35596	70542
4	Moderate to Severe erosion	4540	848	523	38362	6632	3033	53938
5	Severe erosion	892	2380		18193	12991	251	34707
6	Severe to Very severe erosion	342	5066	553	10562	10873	19	27415
7	Miscellaneous	14012	7777	7149	16225	538	76389	122090
	Total	90768	42569	164686	224479	52578	347022	922102

12. Priority Categorization:

S. No.	Priority Category	No. of Microwatersheds	Area (ha)	Area %
1.	Very high (above 70)	53	49861	5.4
2.	High (66 – 70)	35	36229	4.0
3.	Medium (61-65)	95	94938	10.3
4.	Low (56-60)	609	688831	74.7
5.	Very Low (55 & Below)	42	52243	5.7
	Grand Total	834	922102	100

13. Watershedwise Distribution of Area (in ha) under Different Priority Categories:

S. No.	Priority Category	4G1									Total Area	Area %
		A1	A2	A3	A4	A5	A6	A7	A8	A9		
1.	Very high (above 70)	21910	14703	13248							49861	5.4
2.	High (66 – 70)	15261	8155	9770	3043						36229	3.9
3.	Medium (61-65)	17279	21655	26037	17787	12180					94938	10.3
4.	Low (56-60)	28663	13512	34563	62788	115254	207037	96004	54574	76436	688831	74.7
5.	Very Low (55 &Below)	12286	18504	1505	2547	1939		1118	10406	3938	52243	5.7
	TotalArea	95399	76529	85123	86165	129373	207037	97122	64980	80374	922102	100

14. Districtwise Distribution of Area (in ha) under Different Priority Categories:

S. No.	Priority Category	Cuttack	Ganjam	Jagat singhpur	Khorda	Nayagarh	Puri	Total Area	Area (%)
1	Very high (above 70)	-	2593	-	21792	25476	-	49861	5.4
2	High (66 – 70)	38	11913	-	17502	6776	-	36229	3.9
3	Medium (61-65)	7612	8823	-	66659	11810	34	94938	10.3
4	Low (56-60)	78062	18633	154280	113082	8516	316258	688831	74.7
5	Very Low (55 & below)	5056	607	10406	5444	-	30730	52243	5.7
	Total Area	90768	42569	164686	224479	52578	347022	922102	100

15. Salient Features of the Area:

- The survey area consists of 834 microwatersheds covering 922102 ha. The survey area has 53 and 35 microwatersheds under the category of very high and high priority respectively, covering total area of 86090 ha (9.3%). 95 microwatersheds covering 94938 ha are categorized under medium priority category. An area of 688831 ha (74.70%) covered by 609 microwatersheds are coming under low priority category and remaining 42 microwatersheds covering an area of 52243 ha (5.7%) is under very low priority category.
- Severe and severe to very severely eroded lands altogether occupy 62122 ha (6.8%) and it needs proper soil conservation practices. The area under moderate erosion and moderate to severe erosion category occupies 124480 ha (13.50%).Khorda districts have maximum area under this category. The maximum area of 591049 ha (64.1%) does not have problem of soil erosion.
- Under Very high and high priority category comprises 5.4% and 3.9% respectively of total area. Total area of very high and high category are distributed in three watersheds 4G1A1, 4G1A2 and 4G1A3
- Khorda and Nayagarh districts has maximum area of very high and high priority followed by the Ganjam and Cuttack districts.

How to use Soil Survey Report

The report embodies the results of the Priority delineation survey conducted for identification and delineation of priority microwatersheds of 4G1A1-9 watersheds of 4G1A subcatchment of Mahanadi Basin in Odisha. The report explores valuable information about land and soil characteristics of the watersheds. The main objective of the survey is to identify microwatersheds which generate comparatively high runoff towards the lower catchment. Maps showing the demarcation of priority microwatersheds in 4G1A subcatchment in the scale of 1: 50,000 are appended with the report.

The catchments of Centrally Sponsored Scheme are delineated and codified following the codification system of Watershed Atlas of India (WAI) published by Soil & Land Use Survey of India. The surveyed area comprises nine watersheds (4G1A1-9) which are subdivided into 125 Subwatersheds and finally into 834 microwatersheds. Subwatersheds are codified by suffixing small case English alphabets with the watershed code e.g. 4G1A1a, 4G1A1b, 4G1A1c etc. and microwatersheds are codified by affixing Arabic numericals with subwatersheds code, 4G1A1a1, 4G1A1b1, 4G1A1c1 etc. Different Runoff Potential Mapping Units (RPMUs) are identified and denoted by capital English alphabets coined from parent material of this area such as 'A' for alluvium. The mapping unit connotes a set of soil and land attributes namely, physiography, slope, soil characteristics, land use/land cover, erosion hazards and conservation practices. The description of mapping units with their Runoff Potential values is presented in Table 5. The differentiating characteristics of each mapping units are furnished in Table 6.

The details of computation of Runoff Potential Index are given in Annexure - I which list the microwatersheds in systematic order of codification with relative priority. Microwatersheds with their area under different priority categories are summarized in Annexure-II. In the Annexure-II microwatersheds have been arranged in descending order according to their priority rating i.e. very high, high, medium, low and very low categories. Watershedwise and Districtwise grading of microwatersheds under different priority categories are presented in Table 17 & 18. In addition to select priority microwatersheds for soil and water conservation programme, the data contained in mapping legend can also be used for characterization of any part of catchment with respect to slope gradient, broad soil groups, present land use, surface condition, erosion and problems as well. Details of microwatershedwise computation of RPI values and the districtwise priority categorization are furnished in Annexure I & II.
